Chapter 1

INTRODUCTION

1.1 Project Overview

The project is an organization review site, where a user can give feedback various type of organization for developing their service and appreciate their good work .In the time of Internet people are more biased by the people opinion and this site will help people to find good organization where they can trust and can get service from this organization. This website will make an intercommunication between organization and their service holder.

1.2 Purpose of the Project

- To make a user friendly review site.
- User can easily get information about his local organization.
- To know the importance about review site in organizational sector.
- User can easily chose good organization based on the people feedback.
- Organization can improve their service and product based on the people feedback.
- Organization can easily notify their strong and weak side.
- To make interactive communication between user and organization.

1.3 Goal of the Project:

The main goal of the project to make a fruitful interconnection with user and organization where a user can easily chose best organization for his desired service based on organization information and people feedback. Furthermore an organization can easily know their condition by people judgment which can help them to work on their week side and improve their strong side from other competitive organization .In addition using HR blog human recourse managers can communicate one another along with user by sharing idea and own organization related information.

Chapter 2

BACKGROUND STUDY

2.1 Overview

We have analyzed by visiting various type of review website for our background study. We meet some owner of organization to know their requirement if proposed website (Best Organization) is made. Furthermore we visited some renewable organization website to see their own customer review system and try to find how they deal with user feedback.

2.2 Current Situation

These type of website are available in our country and people are using these type of website and most common thing is people can share their opinion and give feedback through this type of website. I search Google to find same sort of website but it is rare to find same exactly same website but I find some organization which has own review system. The specialty of this website is to come most of the organization in one platform for user feedback and review.

Chapter 3

REQUIREMENT ANALYSIS

3.1 Overview:

For requirement analysis we have done it in 3 sub part,

- Firstly visited many website to get the knowledge about the project.
- Analyze the data and information to find different type of requirement for the system.
- Talk some organization owner and general people to collect specific requirement.
- From these information designed ERD and Database.

3.2 Data Requirement:

3.2.1 Admin:

Here for this website admin can be the manager of this website. Admin can edit/update/delete of any post or content which is either HR blog post or other organization information. Admin has authorization to approve or reject any post and user request. The Admin information contain email and password. Admin can edit his profile by providing other information like education, work experience etc.

3.2.2 Sign up:

Sign up is the option through which we will get the information of the user which information we can use for other program. For viewing sign up is not required but for review or comment sign up is necessary.

3.2.3 Organization Information:

A user can easily show various type of organization and they're could be a little bit description with rating in the front page. There would be most rated organization in every month based on user feedback and rating.

3.2.4 Category:

In category various type of organization will divide on various category. For example, Textile organization are put into garments category.

3.2.5 Review and Rating:

A register user can give feedback through commenting and rating. In rating system it would start one and end with five. This system will contain user information and show it on comment and review section.

3.2.6 HR Blog:

In HR blog, where various organization human resource manager can write blog and share information with user and HR manager will show it and allow to give feedback.

3.2.7 Request for Organization Inclusion:

User and HR can apply for organization inclusion on the website. where user can only suggest any organization inclusion by putting name and website link. But HR of the organization can apply for his organization by providing all required information. After admin approval it would be included on website basis on HR information.

Chapter 4

FUNCTIONALITIES

4.1 Overview:

We have divided our functional requirement in two part

- Functional requirement.
- Non-Functional requirement.

4.2 Functional requirement:

- A registered user can suggest organization name to include on website and Organization HR representative can apply for organization inclusion on website by giving organization information.
- A user and HR can register by putting their name, email, and password and in the registration area.
- Store the user information.
- Every kind of registered user can edit, and update their information.
- Giving feedback a user must sign in through user email and password.
- Admin can approve, reject, edit or delete any kind of content, blog, user request and organization request.

4.3 Non-functional requirement:

- Usability: This website are compatible for any kind of web platform.
- Reliability: The system is available on the user need with proper work.
- Performance: Performance refer to the speed in which web page downloaded and displayed to the user's browser .The system will be optimized and can perform better minimal internet connection.
- User Interface: The system interface will be user friendly, that mean any kind of people can use it without prior knowledge.

Chapter 5

ERD DESIGN

5.1 ERD Design:

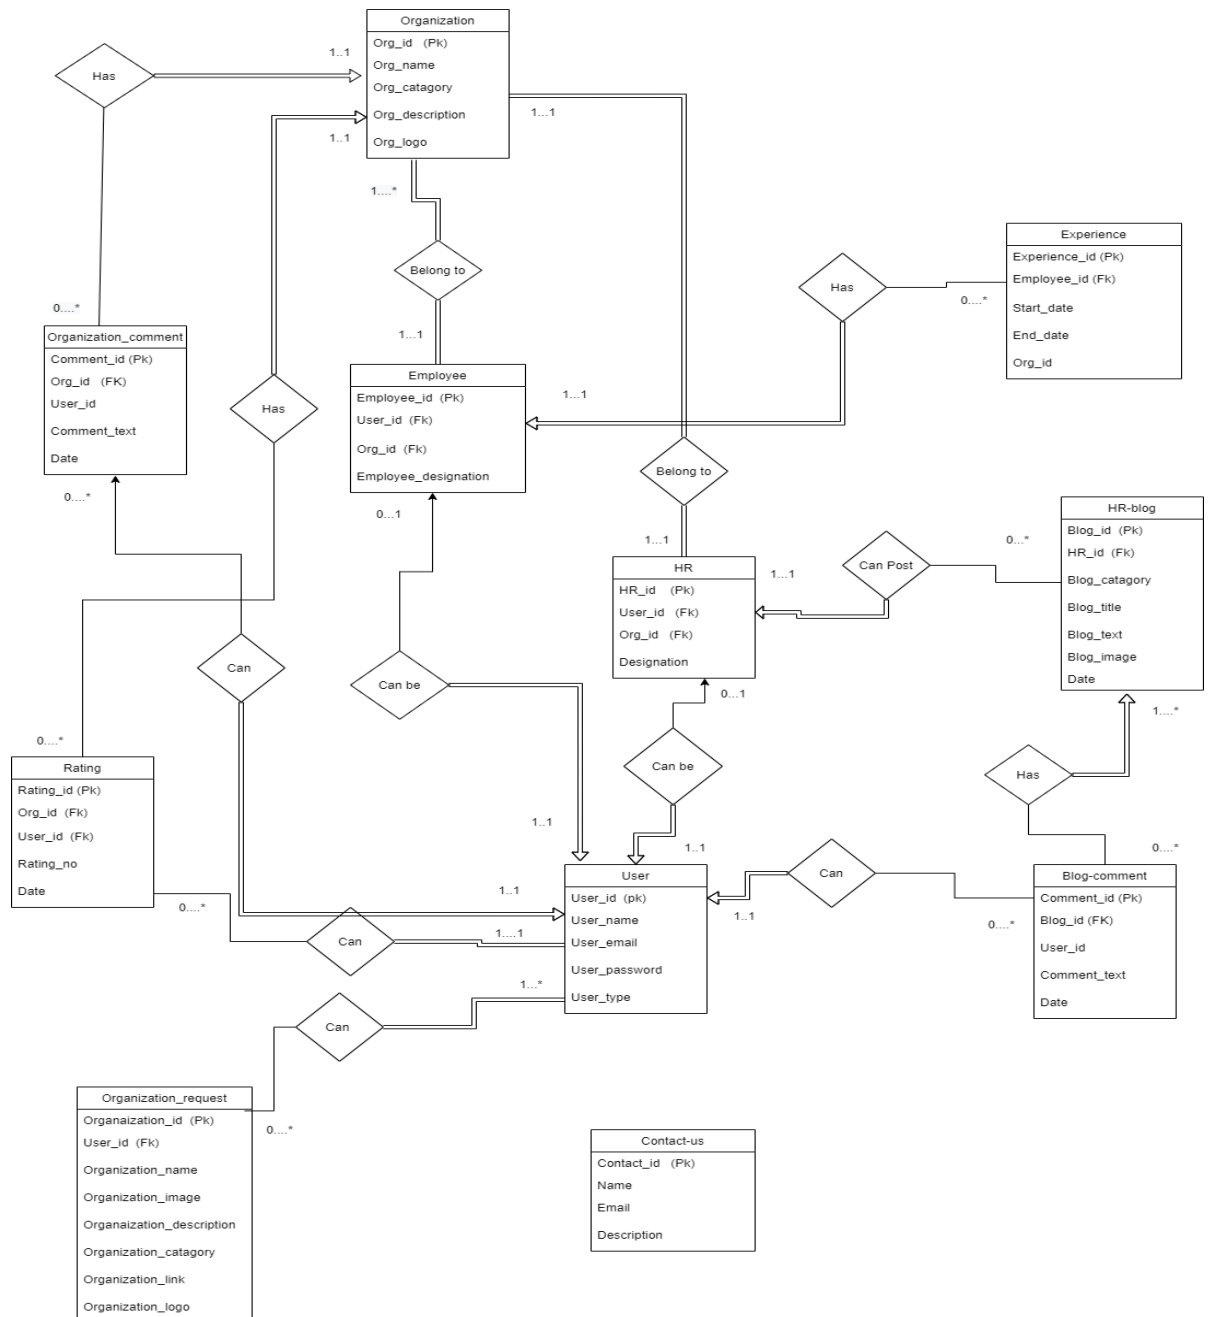

Figure 5.1 ERD Design

Chapter 6

USER INTERFACE DESIGN

6.1 User Interface:

We build this website for making intercommunication between user and organization .In the below section I will demonstrate some user interface of this website.

6.1.1 Landing Page:

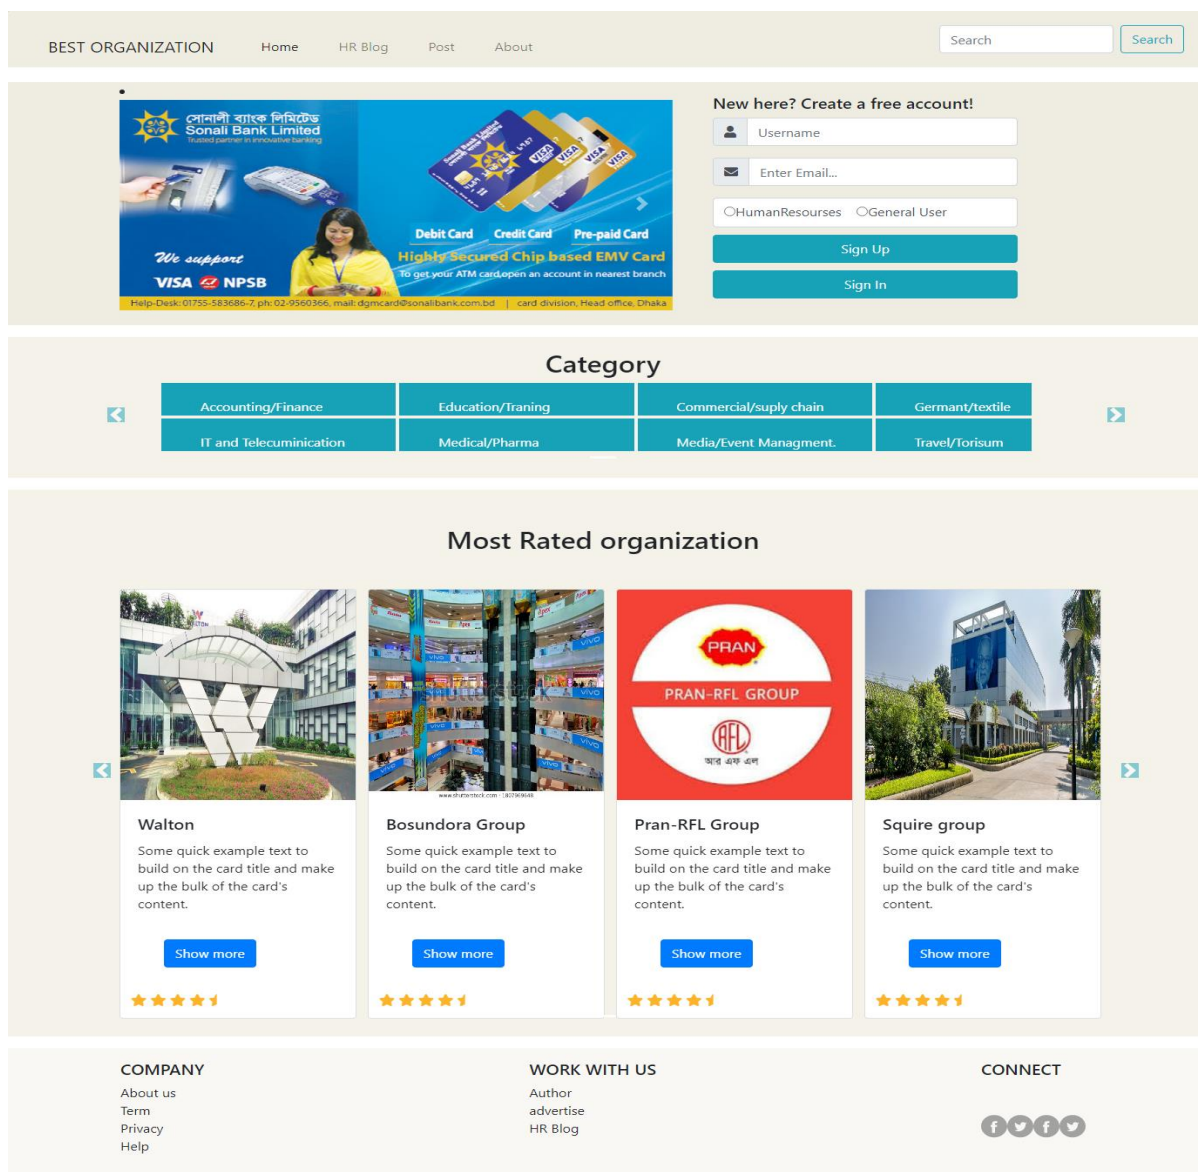

Figure 6.1.1: Landing page

We divide our landing page in five section,

First section contain navigation bar with search menu,

In second section ,left side holding one slider which contain various organization picture and right side contain registration form where an unregistered user can register fill-up by Sign up form and an registered user can enter the website by pressing Sign in button where a sign in form will open .

In third section, organization category are shown where a user can navigate which type of organization and their information contain this website.

In the fourth section which contain overview of most rated organization.

6.1.2 Category page:

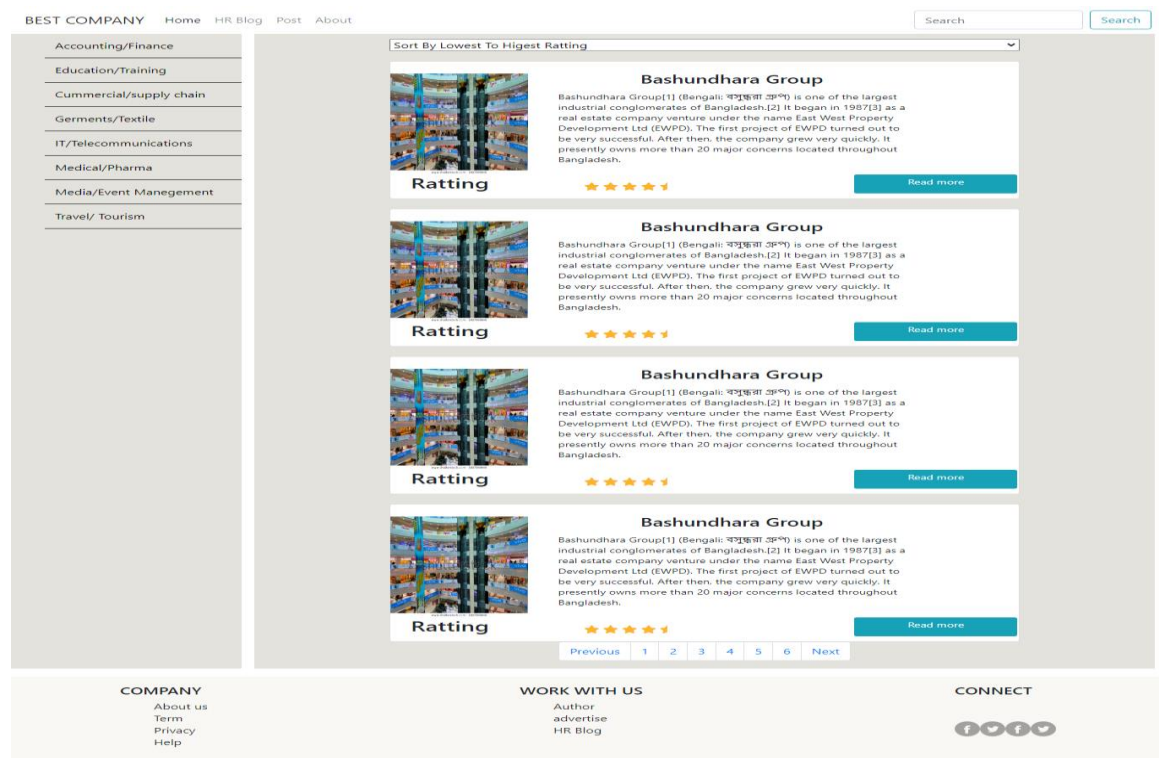

Figure 6.1.2 Category Page

If a user press any link in category section of index page, then it will go to the category page.

In this page same type of organization will show in same page with their user review. From this page user can check other category of organization using the left side bar where existing category will be shown. In top of page there is an option user can sort organization by rating.

About

Bashundhara Group

Bashundhara Group[1] (Bengali: বসুন্ধরা গ্রুপ) is one of the largest industrial conglomerates of Bangladesh.[2] It began in 1987[3] as a real estate company venture under the name East West Property Development Ltd (EWPDL). The first project of EWPDL turned out to be very successful. After then, the company grew very quickly. It presently owns more than 20 major concerns located throughout Bangladesh. Bashundhara Group (founded by Ahmed Akbar Sobhan and present Chairman[4]) began in 1987 as real estate venture. Shafiat Sobhan Sanvir is the Vice Chairman of Bashundhara Group.[5] After its first successful project, Bashundhara invested in new fields, including manufacturing, industry and trading. More enterprises were established in the early 1990s; these included cement, paper, pulp, tissue paper and steel production, as well as LP Gas bottling and distribution. On 4 February 2014, The Bangladesh Supreme Court ordered Bashundhara Group officials to surrender before

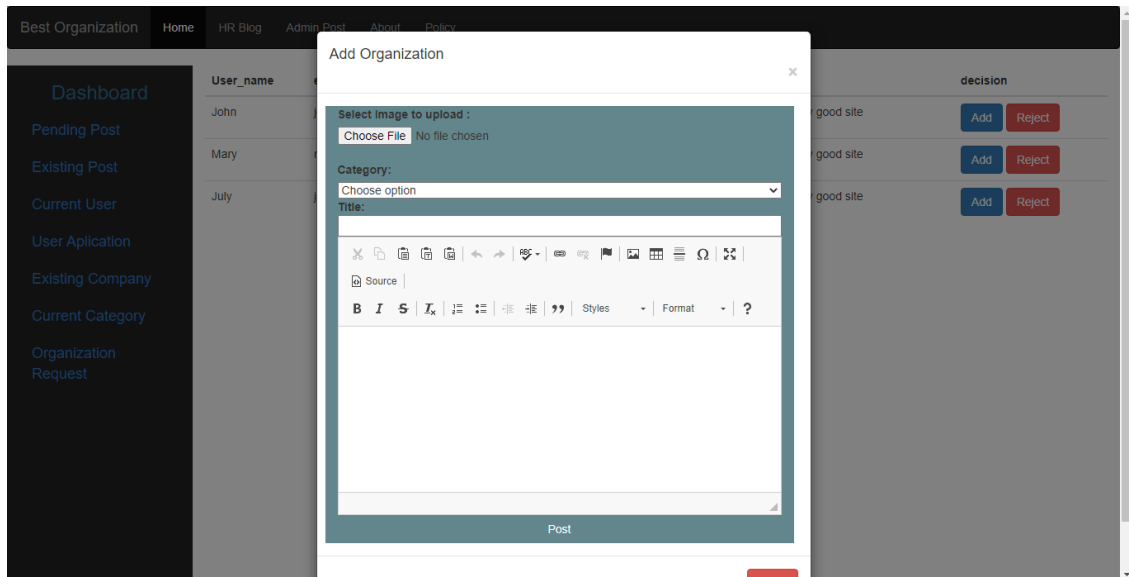

Figure 6.1.23 Admin Organization adding view

Admin can add any organization in this website. The above picture determine admin organization adding view.

Chapter 7

TOOLS USED

7.1 Overview:

In this chapter I will discuss about tools which I used to develop this website

7.2 Tools used:

7.2.1 HTML, CSS:

Basically HTML and CSS are mostly used in designing part which are called front-end designing. Here we used HTML and CSS for our front end designing part. HTML used for coding of design and we used CSS for making the website attractive and user friendly.

7.2.2 Bootstrap and JavaScript:

Here we use Bootstrap and JavaScript for making this website more responsive, efficient and attractive along with user friendly design.

7.2.3 PHP:

I used PHP for designing my backend part that was implemented by row coding of PHP which is used to make dynamic and more efficient for user.

7.2.3 MySQL:

MySQL is open source relational database management system based on structure query language (SQL) I used SQL for designing my database for this website.

7.2.4: CKEditor CDN:

For creating multipurpose text editor we use CKEditor CDN.

Chapter 8

FUTURE WORK

8.1 Overview:

Here I will discuss about feature work of my project. That means which work I will finish after this semester.

8.2 Future work:

- First of all I will complete my remaining user Interface.
- Then I will work on backend for these user interface.
- After that I will test the whole project.
- Then debugging error if any error find solve it before deploying to the user.

Chapter 9

CONCLUSION

9.1 Conclusion:

Best Organization is a web based review site. Our main goal to make interaction between user, organization and human resource section. We have already completed our front end site. Some other user interactive work along with backend development will be completed in future .Now a days people are passed their time using internet and want to suggest other people opinion this site will help to people to find best organization along with their facility.
